

Tritone Technologies Appoints Steffen W. Kuhn as General Manager, Germany & Austria

Tel-Aviv, Israel – July 24, 2023 – Tritone Technologies, a global provider of metal and ceramic additive manufacturing (AM) technology for industrial production, has announced the appointment of Steffen W. Kuhn as GM Germany & Austria. This appointment will strengthen the company's global presence in Europe.

The appointment marks a bold move of the company to establish its foothold in the European market. With a proven track record as an accomplished and prominent leader in the additive manufacturing industry, Kuhn will oversee the emergence of Tritone in Germany & Austria. Kuhn will play a major role in envisioning and executing Tritone's growth strategy in the region, addressing the rapidly growing interest in Tritone systems in this market, the largest in Europe.

Based in Munich, Kuhn brings a wealth of sales and business development experience in senior executive and strategic positions at global AM companies including EOS and Materialise, as well as being a member of the Advisory Council of Mobility goes Additive. Kuhn will be fully supported by Tritone's team of experts, headquartered in Israel.

"The additive manufacturing community has long been waiting for technologies that enable it to cross the tipping-point into true industrial production", says Steffen W. Kuhn, GM Germany & Austria, Tritone Technologies. "Tritone is, undoubtedly, one of the forces that make this transformation possible. I am thrilled to join Tritone and honored to be given the opportunity to lead its journey in this strategically important territory of Germany & Austria".

"At Tritone we recognize an increasing demand for our technology in Germany & Austria, prompting our decision to broaden our global presence and address those market needs", says Ofer Ben Zur, CEO, Tritone Technologies. "Today, we are experiencing a remarkable surge in demand for our technology. Appointing Steffen as our general manager, a leader with outstanding and solid reputation and expertise, serves as a clear and unmistakable testament to our ambitious aspirations within the region".

ABOUT TRITONE TECHNOLOGIES

Tritone Technologies transforms metal additive manufacturing to address the demanding standards and needs of industrial production. The company's innovative technology enables industrial throughput of accurate parts with a range of metal and ceramic materials, suitable for the automotive, aerospace, medical and consumer electronics industries. Founded in 2017, Tritone is led by an experienced team of experts with a track record in driving technology and business growth. Backed by private equity firm Fortissimo, Tritone is a global company, and its headquarters are based in Israel.
