
Tritone Technologies Showcases Industrial Metal and Ceramic Additive Manufacturing Solutions at Rapid + TCT 2023

Tel-Aviv, Israel – April 10, 2023 – Tritone Technologies, a global provider of metal and ceramic additive manufacturing (AM) technology for industrial production, has announced its participation at Rapid + TCT 2023, the largest event for the AM community in North America.

Tritone's innovative MoldJet systems, Dominant and Dim will be on display. Additionally, Tritone will present various applications with a wide range of high-performance materials, including Copper, Stainless Steels, Titanium, Tool Steels, High Temperature Alloys, and Ceramic.

A live demo will illustrate MoldJet's operational advantages, including no loose powder for a green and safe industrial environment, quick changeover between materials and more.

"This is our second time exhibiting in Rapid + TCT. This marks another significant milestone in Tritone's journey", says Ben Arnold, VP Business Development, NA. "Since our US introduction at 2022 event Tritone has expanded and opened a US based subsidiary, to meet the growing demand for our unique technology in the region. Companies want the economic advantages that other Sinter Based AM modalities bring, but they also want flexible, safe, and consistent operating platforms. Tritone and MoldJet bring a better turnkey solution to the market. It's a compelling and fun story to share".
